The alarm sounds.

It always happens earlier than you expect. Luckily, your Newton personal digital assistant (PDA) gives you a head start on your day by keeping you on top of all the things you need to organize, fax, mail, reference, and synchronize. That's because Newton 2.0 is the most powerful engine available for PDAs. It runs on a variety of PDA devices, and provides the best integration with your PC—whether it's running Windows or the Mac OS. Plus extensive communication capabilities for faxing, e-mail, and network access. And all the organization features you need for managing your business and personal information. You'll be surprised how quickly you come to rely on your Newton PDA to assist you in everything you do—from the second your alarm goes off in the morning to the minute your head hits the pillow at night.

Your Newton PDA has a built-in alarm clock—set it to wake you up or to remind you that it's time for a meeting.

Mandy turns off the
alarm.

Barney jots down some notes during his morning commute.

Your Newton PDA Notepad lets you take notes in different formats—as a plain note, an outline, or even a checklist. You can write notes in ink text, or you can use the Newton 2.0 advanced recognition software to convert your printing into typed text.

Patricia checks her

e-mail.

Through a built-in e-mail client, users can send and receive e-mail on commercial services such as CompuServe, Prodigy, America Online—and even the Internet.

David keeps a

to-do list.

You'll have a complete record of everything you need to get done—and you can prioritize items and set reminders for specific tasks.

Finish Project Outline
2 Call insurance company
3 Get haircut
Check status of car repair
Schedule meeting with staff
Finish spreadsheet
Complete proposal
First draft of brochure
Evaluations

Karen looks up the phone number of an airline in her Newton PDA Names file so she can confirm

her flight.

Robert uses the built-in call log to

keep a record

of the phone calls he needs to return today.

Your Newton PDA can even dial the phone automatically.

Renée reschedules her appointment.

Consult your personal calendar to remind yourself of birthdays, doctor's appointments, meetings, and other events.
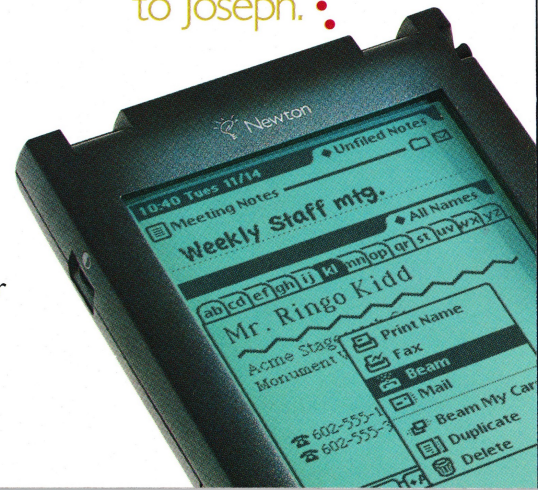

Sean beams a business card to Joseph.

Newton PDAs support infrared communications so you can wirelessly "beam" anything on your screen to other Newton PDA users.
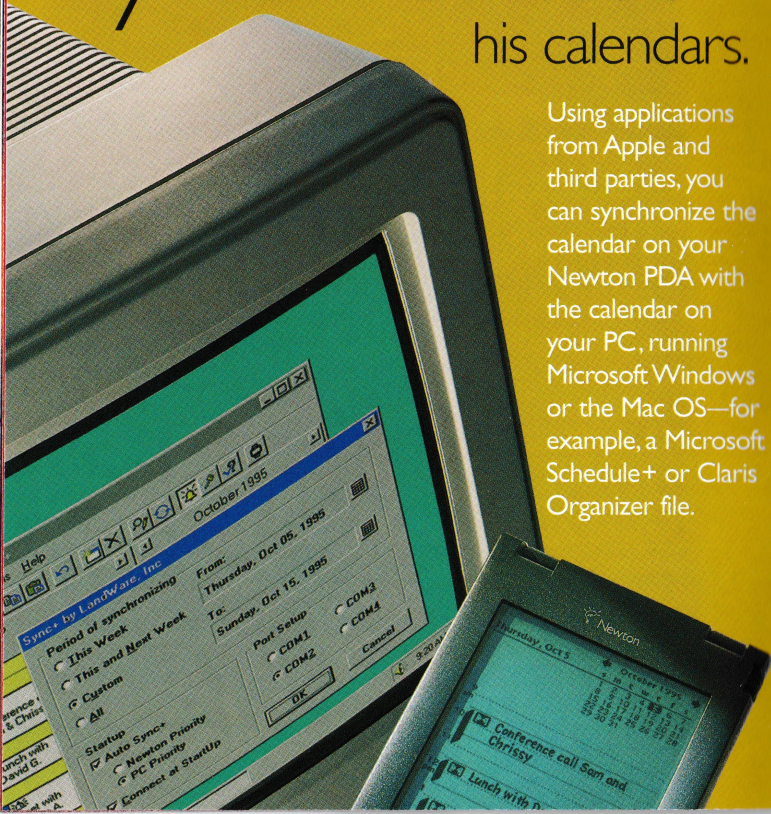

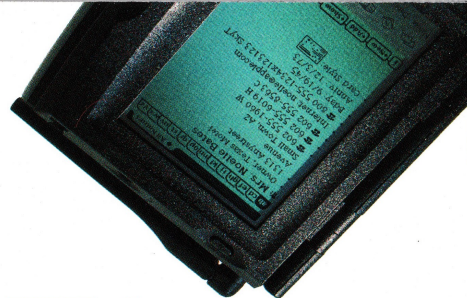

Andy
synchronizes
his calendars.

Using applications from Apple and third parties, you can synchronize the calendar on your Newton PDA with the calendar on your PC, running Microsoft Windows or the Mac OS—for example, a Microsoft Schedule+ or Claris Organizer file.
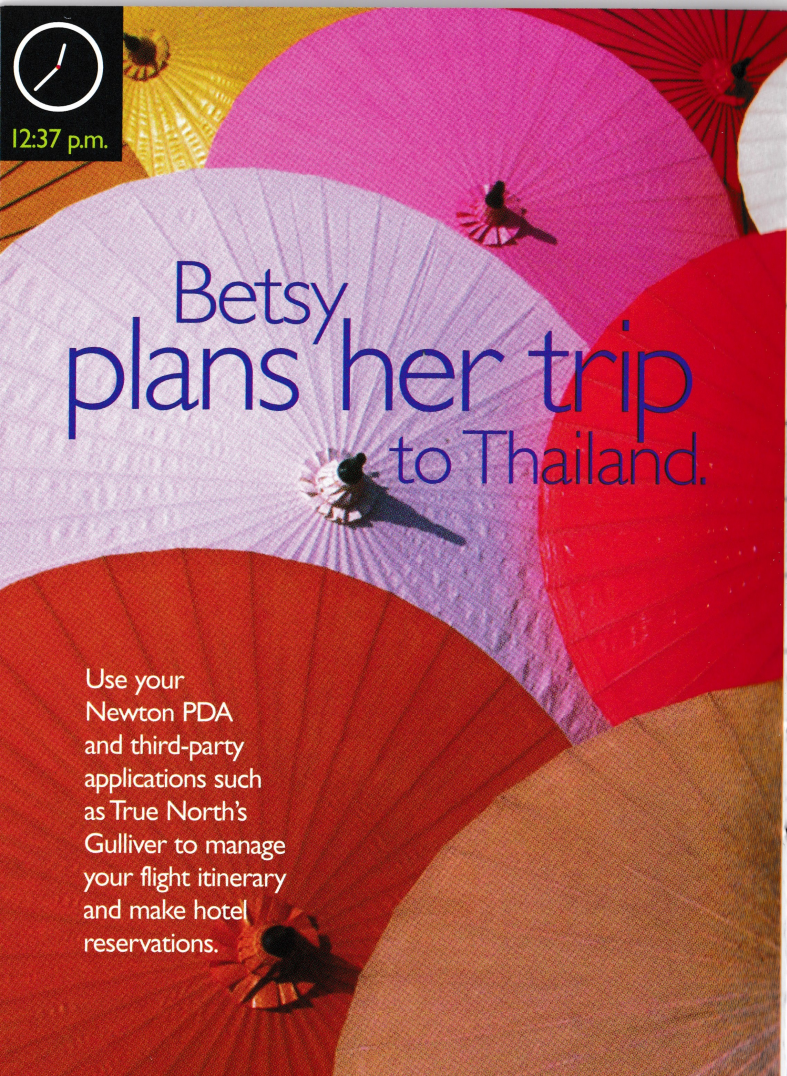

Liz
imports
her contacts file from her PC into her Newton PDA.

Whether you're using NetManage Ecco on your Windows 95-based PC, or Now•Contact on your Mac OS-based computer, you can import names and addresses into your Newton PDA.
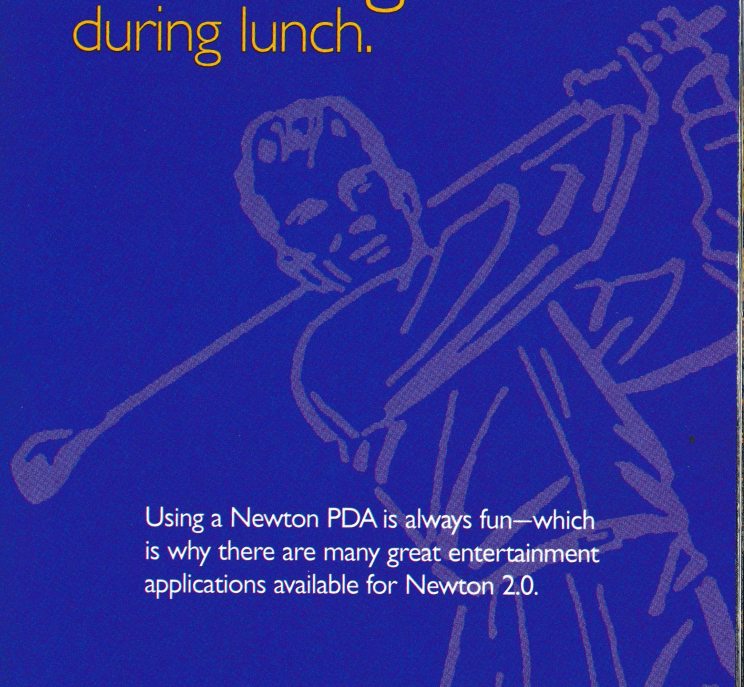

Betsy plans her trip to Thailand.

Use your Newton PDA and third-party applications such as True North's Gulliver to manage your flight itinerary and make hotel reservations.

Rick plays Gold Tee at Big Horn during lunch.

Using a Newton PDA is always fun—which is why there are many great entertainment applications available for Newton 2.0.

Using the Newton Backup Utility, you can back up your Newton PDA data on your PC running Windows or the Mac OS, to help keep it safe.
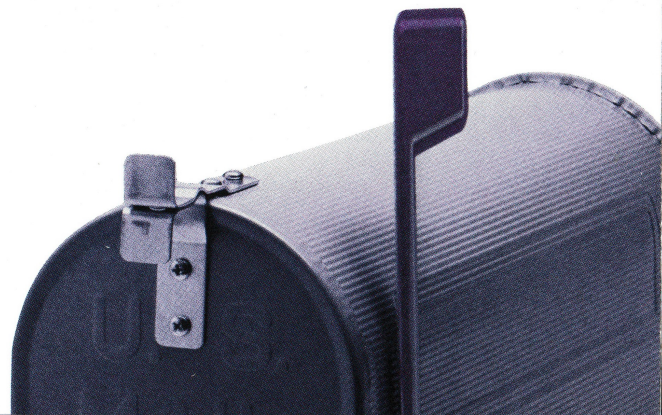

Michael **backs up** his Newton data on his PC.

## Nicola retrieves her cc:Mail e-mail.

Add some simple software and Newton 2.0 lets you use your Newton PDA to check LAN-based e-mail while you're on the road—such as Lotus cc:Mail, Microsoft Mail, and CE Software's QuickMail.

Christine replies to an urgent message—

wirelessly.

Sometimes you can't be connected to a phone line. Using third-party products such as RadioMail or SMS and a Newton PDA, you can send and receive messages no matter where you are.

Aldo fills in the cost of his business lunch—and tip.

Using ExpensePlus software from PowerWare, Inc. on your Newton PDA makes keeping track of your business expenses easier than ever. When you get back to your desk, you can import your data directly into a Microsoft Excel or Lotus 1-2-3 spreadsheet to print.

Julio publishes

Newton Press lets you easily create electronic books on your PC and read, annotate, and distribute them on Newton PDAs. Using text and graphics he's dragged off his PC, Julio builds a mini travel guide about Chicago, and sends it to his sales reps.

a book about Chicago for his team.

Keith

uses the Outline feature to

organize

his speech notes.

Phoebe checks her
e-mail, using her
Newton PDA
and

mobile phone.

You can connect
your cellular
phone or GSM
digital phone to
your Newton
PDA and call your
e-mail system to
retrieve messages.

You can export data
you've recorded in
your Newton PDA
into a Lotus 1-2-3 or
Microsoft Excel
expense report form
residing on your PC
running Windows or
the Mac OS.

Theresa exports
her business expenses to her PC.

Liam types a memo to his boss.

You can use the new external Newton keyboard or tap on the built-in keyboard on your Newton PDA, to compose memos or faxes.

Monica writes some comments on the fax— and gets them back to her boss at the office.

Newton 2.0 lets you send and receive faxes— and even annotate the ones you receive.

Anne gets

paged

on her Newton PDA.

Just slip a paging
card into the
PC Card slot in
your Newton
PDA, and you
can send and
receive pages.

Hiroki **tracks**
his credit card payments using
Pocket Quicken. And when he returns
to his office, he can
synchronize that data
with the Intuit Inc.
Quicken files on his PC.

Cindy

double-checks

her investments.

Several spreadsheet programs for the Newton PDA—such as QuickFigure Pro from PelicanWare, Inc.—let you know where your money is at all times.

Rajiv logs on to e-mail from his mother's house.

With your Newton PDA, you're never out of touch with your Internet e-mail, since all you need to access it is a modem and software such as Eudora Light for Newton from QUALCOMM, Inc.
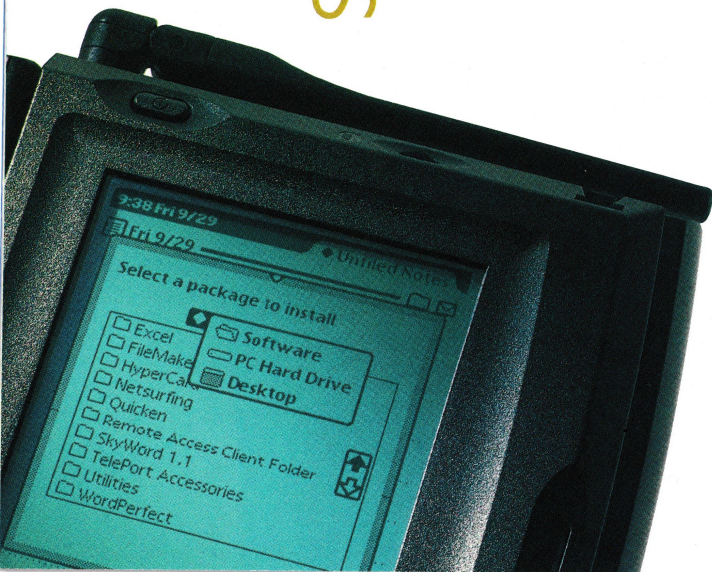

Franco **installs**

some new software.

Using the Newton Backup Utility, you can access your PC's hard drive and select software to install on your Newton PDA.
